SANITARY WARE SPECIFICATION SHEET

INSTALLATION:

Reference installation instructions, steps 1-5, to mount the wall bracket and then affix waste receptacle. Securely fix wall bracket assembly to the wall using four sheet-metal screws according to the recommended installation height above finished floor. For plaster or dry wall construction, provide concealed backing to comply with local building codes, then secure unit with sheet-metal screws. For other wall surfaces, provide fiber plugs or expansion shields for use with sheet-metal screws, or provide 1/8" (3mm) toggle bolts or expansion bolts. Then, install upper bin bracket against the backside of the waste receptacle. Install lower bin bracket against the backside of the waste receptacle. Mount lower bin bracket against wall bracket assembly.

Designer's note: a dedicated rubber band - not furnished - will be fixated around the overlaid plastic bag, also not furnished holding the plastic bag in snug fit around the waste container, providing a clean look by preventing the plastic bag from being wrapped outside, around the waste receptacle. Please use widely available Waste bag-rubber bands ("can bands") of 7" x 1/8" for max. 32 gal.

SPECIFICATION:

Surface-mounted waste receptacle, type 304 stainless steel, 18 gauge (1.2mm) with satin finish. All-seam-welded construction with hemmed edges at top and bottom. Equipped for hosting a removable waste container, capacity 22.6 L (6 gal.). Furnished with a leak-proof rigid molded plastic waste container. Removable for servicing. Capacity: 22.6 L (6 gal.).
